

Jack Priemer

→ **Major :** My major is **Business Management** and my minor is **Supply Chain Management**. After graduation from UNR, I am planning on getting a masters in supply chain management. After that, I hope to find a stable job inside of that field. I picked supply chain because there are a lot of opportunities for that career in Reno.

→ **Technical Background:** I have owned a **PC** for 7 years, and consider myself more technically advanced then the average college student. I am familiar with most programs, such as word, excel, google docs, or powerpoint. I use these mostly for school, but use excel frequently in my current job which is as a Golf/Ski supervisor at Everline Resort. I am also familiar with building PCs, especially in relation to gaming, as my cousin who is a software engineer and myself built my current pc, so I have a great understanding of PC parts and softwares. However, there is still a lot of things I know I could learn about information systems and technology, especially in the new age of AI.

About me: I am originally from Fairfax Virginia, which is where I was born and raised until 6th grade, when I moved to Reno. I came to UNR because I wanted to stay local and reduce my cost of college. I go back to the east coast every summer, and look forward to it every year. I have played Basketball my whole life, and was on the Reno High basketball team for 3 of my high school years, only missing the 21' season due to sports being cancelled in Nevada due to covid. I also played 2 years of Varsity soccer in high school, but stopped after my sophomore year. Some of my hobbies include playing pickup basketball at local gyms, skiing, and hiking. I love the outdoors, and often hike with my dog thunder during the summer. I've skied at Squaw (now Palisades) and Sugar Bowl since I moved to the west coast, although have rarely gotten out since covid due to the 45 minute drive and increasing season pass prices every year. Skiing is definitely one hobby I wish I could do more of. I think the rush of flying down an empty slope is something everyone should experience at least once, although the mountain is often busy now. I also enjoy playing video games with my friends, and built a PC over covid so we could all play together. My favorite movie of all time is Grown Ups 2, I've seen it probably close to 100 times and can say most of the dialogue. I love watching football on Sundays and spending time with friends and family. I'm more of a homebody, and like spending time at home relaxing, especially after a week of school. My dream is to get a Masters in Supply Chain Management, and find a stable high paying job in Reno that allows me to continue my hobbies that I have now.
